

Annex to the Litter Inspection Report

Original: Breed Warden / One copy each: Breeder and puppy buyer

All findings in regards to exterior anomalies (faults) are to be manifested by the Breed Warden / designated litter inspector in this annex for each individual puppy.

As a consequence, the breeder and puppy buyer obtain a neutral assessment of the puppy in regards to specified criteria.

Not all manifested faults must be of permanent nature. Some faults, e. g. jaw occlusion, can disappear as the dog develops. However, other faults might appear after a period of time.

Nonetheless, a status is to be established at the time of litter inspection.

Kennel name \_\_\_\_\_

Breeder \_\_\_\_\_

Name of puppy \_\_\_\_\_ ZB.-No. \_\_\_\_\_

The puppy has the following anomalies (faults):

(please check)
